

Michelle Sofia-Gutierrez

Full-Stack Developer | Software Architecture

Barcelona, Spain

📞 34 002 000 000 ✉ michelle.s.gutierrez@example.com [linkedin.com/in/michelles-gutierrez](https://www.linkedin.com/in/michelles-gutierrez) github.com/msg1654utierrez

Summary

Senior Full-Stack Developer and Platform Engineer with a focus on building resilient backend services, scalable frontend architectures, and automated CI/CD pipelines. Experienced in bridging the gap between complex client requirements and clean, secure code, while optimizing system performance and engineering smooth development workflows.

Experience

Senior Full-Stack Developer

Nexus Tech Solutions

Barcelona, Spain (Hybrid)

Jul. 2023 - Present

- **Architecture & Scaling:** Architected and developed a high-traffic SaaS dashboard using React and TypeScript, successfully scaling the platform to serve over 50,000 monthly active users.
- **API Optimization:** Migrated legacy REST APIs to a unified GraphQL endpoint, optimizing database query logic and reducing client-side data fetching time by 40%.
- **Pipeline Automation:** Implemented automated integration and unit testing (Jest/Cypress) within GitHub Actions CI/CD pipelines, increasing code coverage to 85% and reducing critical production bugs.

Software Developer (Client Solutions)

FinTech Partners UK

London, UK

May. 2020 - Feb. 2023

- **Customer-Centric Engineering:** Served as the primary technical liaison for enterprise clients, translating complex business requirements into actionable engineering sprints and bespoke software features.
- **Platform Integration:** Engineered custom API integrations bridging the core application with legacy client systems, reducing onboarding time for new enterprise accounts by 30%.
- **User Acceptance Testing (UAT):** Directed live product demonstrations and UAT sessions, utilizing direct customer feedback to refine front-end UI components and workflows.

Program Coordinator & Instructor

Austin Cinematic Arts Center

Austin, TX

May 2019 - Apr. 2020

- **Event Logistics & Operations:** Directed scheduling and logistical operations for community film screenings, theatrical performances, and independent arts festivals.
- **Curriculum Development:** Developed and facilitated educational workshops for local residents, focusing on cinematic history, digital storytelling, and media literacy.

Web Developer (Contract)

OptimaWeb Solutions

Austin, TX

Sept. 2018 - Apr. 2019

- **Component Development:** Translated UI/UX wireframes into functional, modular React components and managed global state using Redux for a fast-paced EdTech startup.
- **Cross-Browser Debugging:** Debugged networking and browser-side execution errors, ensuring uniform layout rendering across legacy and modern browsers.

Junior Web Developer

Boston Logic

Boston, MA

Jul. 2017 - Aug. 2018

- **Feature Implementation:** Maintained and expanded existing monolithic applications, migrating legacy jQuery interfaces to modern React components.
- **QA & Documentation:** Authored comprehensive technical documentation for internal developer onboarding and wrote unit tests for REST endpoints using Jest.

Software Engineering Intern

Commonwealth EdTech

Boston, MA

May 2016 - Aug. 2016

- **Feature Development:** Assisted in migrating a legacy jQuery student portal to React.js, improving page load speeds by 25%.
- **QA & Testing:** Wrote comprehensive unit tests using Jest and documented REST API endpoints for the backend engineering team.

Professional Credentials & Modern Stack Exposure

Backend Engineering & Service Architecture

- **Python**: Production implementation for backend automation & data pipelines | **Node.js**: Corporate training & microservices architecture project | **Objective-C**: Academic coursework (Boston University) & legacy mobile support
- ## Front-End Systems & Client Integration
- **TypeScript & JavaScript (ES6+)**: Core stack implementation across enterprise client projects | **React.js**: Advanced component design & state management optimization | **Next.js**: Production deployment for high-traffic web applications
- ## Platform Engineering, Security & Governance
- **Google Cloud Platform (GCP) & Cloud Run**: Administration & deployment training | **Containerization via Docker**: Hands-on pipeline integration | Dedicated training on **OWASP** secure coding principles (2025) | **GDPR / ISO 27001**: Compliance framework implementation (2023–2025)

Engineering Workflows & AI Implementation

- Introduction to **Artificial Intelligence and Optimization algorithms** with **Python** (MIT Online, Professional Cert. - In Progress) | **Generative AI & Agentic AI**: Model implementation and logic flows (IBM/Red Hat training, 2025–2026) | **CI/CD**: GitHub Actions automation project | **Agile Engineering**: GitFlow workflow standardization (Atlassian Cert., 2024)

Writing & Publications

Advanced Web Architecture: GraphQL API Migration | Custom React Hooks

Authored architectural deep-dives and technical tutorials for premier engineering outlets including The Modern Stack (UK) and Web Engineering Hub.

Modern JavaScript & UI/UX: The Component Tree (Personal Blog)

Authored 50+ articles focused on ES6+ and early React architecture, growing to 15,000 monthly readers before pivoting focus to open-source contributions.

Human-Computer Interaction (HCI): Accessibility First: Screen Readers & Virtual DOM

Co-authored an academic paper evaluating ARIA labels and semantic HTML performance within complex SPAs for the Boston University department symposium.

Education & Linguistic Competencies

Artificial Intelligence Algorithms for professionals (with Python)

6-month intensive focus on AI, algorithmic logic and neural networks using Python.

Bachelor of Arts in Computer Science | Boston University

Minor in Interactive Design. Coursework focus on data structures, algorithmic logic, and web engineering.

Languages

- | | |
|--|---|
| • English : Native Mastery, Academic Specialization | • French : Operational/Working Proficiency (B1) |
| • Spanish : Full Professional Mastery (C2) | • Latin : Academic Specialization/Basic Proficiency (A2) |

Hobbies & Interests

Cinematic Curation & Independent Film: Analyzing narrative screenwriting structures and volunteering at independent film festivals.
Marathon Training & Long-Distance Running: Endurance sports as a practical discipline for cultivating long-term stamina.
Reflective Journaling & Behavioral Psychology: Studying cognitive patterns and utilizing structured writing for personal retrospectives.
